COMBUSTION AND FLAME

THE JOURNAL OF THE COMBUSTION INSTITUTE

VOLUME 84 1991

Contents

Obituary: Joseph Oakland Hirschfelder 1

KAZUYOSHI NAKABE, YUKIO MIZUTANI (Osaka, Japan), TOMOYUKI HIRAO (Hiroshima, Japan), and HIROYUKI FUJIOKA (Aichi, Japan)
An Experimental Study on Detailed Flame Structure of Liquid Fuel Sprays With and Without Gaseous Fuel 3

MARTIN HERTZBERG and ISAAC A. ZLOCHOWER (Pittsburgh, PA)
Devolatilization Wave Structures and Temperatures for the Pyrolysis of Polymethylmethacrylate, Ammonium Perchlorate, and Coal at Combustion Level Heat Fluxes 15

CRAIG B. VAUGHN, WILLIAM H. SUN, JACK B. HOWARD, and JOHN P. LONGWELL (Cambridge, MA)
Measurements and Modeling of Light Hydrocarbons in Rich C_2H_4 Combustion in a Jet-Stirred Reactor 38

M. LOEWENBERG and Y. A. LEVENDIS (Pasadena, CA)
Combustion Behavior and Kinetics of Synthetic and Coal-derived Chars: Comparison of Theory and Experiment 47

TAKASHI TSURUDA and TOSHISUKE HIRANO (Tokyo, Japan)
Local Flame Front Disturbance Development Under Acceleration 66

JOHN A. VANDERHOFF (Aberdeen, MD)
Species Profiles in Solid Propellant Flames Using Absorption and Emission Spectroscopy 73

P. LOGAN, J. W. LEE, L. M. LEE, A. R. KARAGOZIAN, and O. I. SMITH (Los Angeles, CA)
Acoustics of a Low-Speed Dump Combustor 93

K. TAKAHASHI, T. MIYAKE, T. INOMATA, T. MORIWAKI, and S. OKAZAKI (Tokyo, Japan)
Influence of Obstacles on Flame Propagation and Gas Movement Ahead of Flame in an Open Space—Effects of Nets Laid on Floor 110

Y. CHEN, A. FRENDI, S. S. TEWARI, and M. SIBULKIN (Providence, RI)
Combustion Properties of Pure and Fire-Retarded Cellulose 121

A. ISHIHARA, M. Q. BREWSTER, T. A. SHERIDAN, and H. KRIER (Urbana, IL)
The Influence of Radiative Heat Feedback on Burning Rate in Metalized Propellants 141

G. W. KOROLL and R. K. KUMAR (Pinawa, MB, Canada)
Isotope Effects on the Combustion Properties of Deuterium and Hydrogen 154

S. BHATTACHARJEE and R. A. ALTENKIRCH (Mississippi State, MS)
The Effect of Surface Radiation on Flame Spread in a Quiescent Microgravity Environment 160

F. CARNASCIALI, J. H. S. LEE, R. KNYSTAUTAS (Montreal, Canada), and F. FINESCHI (Pisa, Italy)
Turbulent Jet Initiation of Detonation 170

L.-E. ÅMAND and B. LECKNER (Göteborg, Sweden)
Influence of Fuel on the Emission of Nitrogen Oxides (NO and N_2) From an 8-MW Fluidized Bed Boiler 181

M. MAWID and S. K. AGGARWAL (Chicago, IL)
Analysis of Transient Combustion of a Multicomponent Liquid Fuel Droplet 197

DANIEL J. MALONEY, EMAIL R. MONAZAM, STEVEN D. WOODRUFF, and LARRY O. LAWSON (Morgantown, WV)
Measurements and Analysis of Temperature Histories and Size Changes for Single Carbon and Coal Particles During the Early Stages of Heating and Devolatilization 210

W. J. SHEU (Evanston, IL) and G. I. SIVASHINSKY (Tel-Aviv, Israel)
Nonplanar Flame Configurations in Stagnation Point Flow 221
ISMAIL CELIK and YI-ZUN WANG (Morgantown, WV)
Pulsating Gas–Solid Flow Inside a Bench-Scale Reactor 225
J. H. TIEN and M. MATALON (Evanston, IL)
On the Burning Velocity of Stretched Flames 238
J. L. ELLZEY, K. J. LASKEY, and E. S. ORAN (Washington, DC)
A Study of Confined Diffusion Flames 249
J. M. JANSSEN and D. W. SENSER (West Lafayette, IN)
Incipient Soot Formation in Dichloromethane–Methane–Air Premixed Flames 265
W. R. WILLIAMS, M. T. STENZEL, X. SONG, and L. D. SCHMIDT (Minneapolis, MN)
Bifurcation Behavior in Homogeneous–Heterogeneous Combustion: I. Experimental Results Over Platinum 277
X. SONG, W. R. WILLIAMS, L. D. SCHMIDT, and R. ARIS (Minneapolis, MN)
Bifurcation Behavior in Homogeneous–Heterogeneous Combustion: II. Computations for Stagnation-Point Flow 292
G. O. THOMAS, P. SUTTON, and D. H. EDWARDS (Aberystwyth, UK)
The Behavior of Detonation Waves at Concentration Gradients 312
M. A. DELICHATSIOS, TH. PANAGIOTOU, and F. KILEY (Norwood, MA)
The Use of Time to Ignition Data for Characterizing the Thermal Inertia and the Minimum (Critical) Heat Flux for Ignition or Pyrolysis 323
T. H. LIN and Y. Y. SHEU (Tainan, Taiwan)
Theory of Laminar Flame Propagation in Near-Stoichiometric Dilute Sprays 333
CHRISTOPHER J. RUTLAND (Madison, WI) and JOEL H. FERZIGER (Stanford, CA)
Simulations of Flame–Vortex Interactions 343
M. FAIRWEATHER (Solihull, England), W. P. JONES, R. P. LINDSTEDT, and A. J. MARQUIS (London, England)
Predictions of a Turbulent Reacting Jet in a Cross-Flow 361
SHELDON R. TIESZEN, DOUGLAS W. STAMPS (Albuquerque, NM), CHARLES K. WESTBROOK, and WILLIAM J. PITZ (Livermore, CA)
Gaseous Hydrocarbon-Air Detonations 376
K. N. C. BRAY (Cambridge, UK), MICHEL CHAMPION (Poitiers, France), and PAUL A. LIBBY (La Jolla, CA)
Premixed Flames in Stagnating Turbulence: Part I. The General Formulation for Counterflowing Streams and Gradient Models for Turbulent Transport 391
J. D. BUCKMASTER (Urbana, IL), G. JOULIN (Poitiers, France), and P. D. RONNEY (Princeton, NJ)
The Structure and Stability of Nonadiabatic Flame Balls: II. Effects of Far-Field Losses 411

Brief Communications

F.-Y. HSHIEH and G. N. RICHARDS (Missoula, MT)
Infrared Investigation of the Oxygen Chemisorption of Wood Char 423
M. F. BARDON and V. K. RAO (Kingston, Canada)
Estimating Instantaneous Properties of Vaporizing Light Petroleum Fractions 427
